

# Duende

# Thank u!

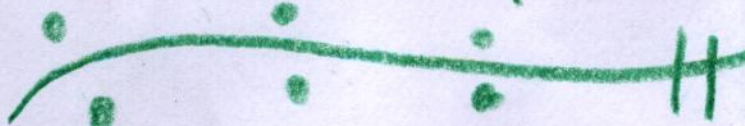

Thank you so much Duende  
For your awesome presentation.  
It was super, and I learned so  
much watching it. My favorite  
part was when you popped  
the balloon with the match, and  
when you did your test on the  
spider, and the mouse. It  
was magnificent. How you  
figured it out. I enjoyed  
it so much. Thank you  
again. 😊

Sincerely,

Sha'nece

Thank  
you  
Duende

Thank you Duende. I really liked that you took the time to come into our classroom and did your performance. It's really cool that I got to learn about air and fire. You are a very good actor and you can also be very funny at the same time. I really like that you base your acts on something for us to learn about. Plus I also like how you do your experiment in front of us to show us how it was done. I hope you come again. Sincerely, Mikayla

## The Air We Share

Dear Mr. Duende

I really enjoyed the show that you put on for our class. I thought when you lit the match and put it to the balloon. Also I liked that you showed us the guy who invented oxygen. I did not know that fire does not survive in a jar, but I did know that all fire needs is fuel oxygen and heat to burn. When you burned the candle the fuel was the wax and the heat was the flame, but without air it can't burn. When you lit the candle in the jar with the plant, which meant there was oxygen, heat, and fuel. I really thought your play was interesting.

Thank You

Sincerely Josh Harrison.

Thank  
you

Duende

I thank you for  
The Air We Share  
Play. The play was  
funny, and creative,  
and very smart. It  
shocked me when you  
set fire to the  
balloon that was cool.  
This play also helped  
me in my science  
test I got a A. Thank  
you again.

Thank You

Very Much

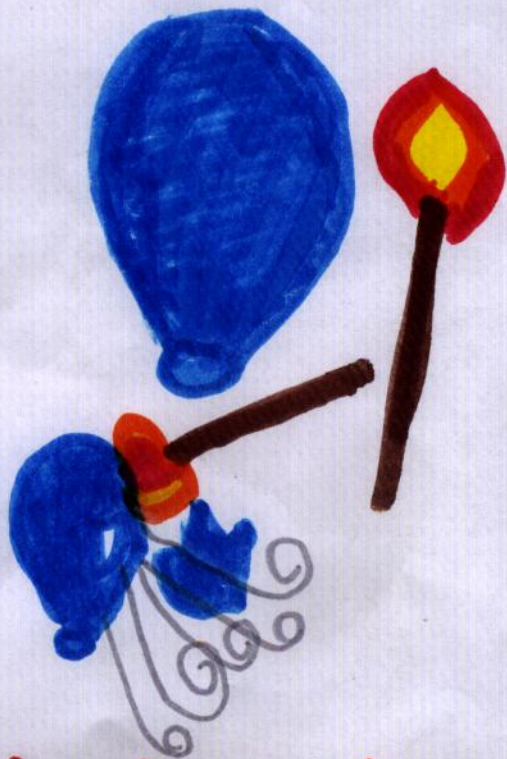

Duende!

Thank you for the play. It was very nice. I got to learn about air we share. You are a really good actor. I like how you do experiments in front of us. I also like how you did your acts. I hope you can come again.

Sincerely, Jocelyn M. 

Air & Fire

Thank  
You  
DUENDE

Air & Fire

Plants will Die with  
out  
No  
Air  
&  
Sun

Thank you for that  
wonderful play about  
air & fire. I personally  
thought it was amazing  
about what is air. I learned  
alot about what  
you did. Thank you and  
hope you can come again.

Sincerely,  
madi
